

2. Alex Belida's 0-6-0 and Shay

This is my brass PFM United CStPM&O "Omaha" 0-6-0 in HO scale, #23. I bought it back in the 1960s at a hobby shop and had it custom painted and lightly weathered professionally with decals added for my Eureka and South Pass Railroad. It doesn't really fit on the late 1890s logging and mining shelf operation I have today. But one engine that does fit is this Shay, a brass United PFM model. *Alex Belida, MMR*
