

## 12. Paul Hutchins' Gondola

This is my favorite car on my layout due to the fact that I did all the detail work on it myself. The HO scale car was painted with a rust-colored acrylic with decals of my favorite road, the Norfolk Southern. I made the pipe load which was painted using a lighter rust-colored acrylic. I weathered the entire car inside and out with Pan Pastels, including the trucks and couplers. *Paul Hutchins*
