

1. Lee Stoermer's Structure Project

Here's my current project. It is a pre-owned structure that had been started but not well finished. I removed all the windows and doors, "reassembled" it, as many of the joints weren't well secured. It was then painted and weathered, and many details added, including lights, duct work, exterior stairway, signs, crane and cable, and electrical meter conduit. Now it's on to setting it in its scene and completing that. Stay tuned!

Lee Stoermer
