

## 6. Greg Cassidy's Projects

On my workbench ([photo above](#)), I have a Vollmer engine house I'm building for the McKeesport Model Railroad Club, an N-scale tractor and rusty car for our Rockville Model Railroad Society layout, and a couple of railfans being prepped for my layout. And since three projects aren't enough, I'm also putting static grass on my layout ([photo below](#)) before finishing it off with Martin Welberg products. **Greg Cassidy**
