

5. Nicholas Kalis' 0-4-0T

Model:

Engine: kit-bashed Fn3 with custom transfers applied and headlight and bell replaced with more prototypical brass replacements

Tender: kit-bashed substructure from HLW Hartland Locomotive Works 15100 Gondola with the gondola discarded and flat car and wheels retained. The HLW raised logo was removed. The superstructure was scratchbuilt using styrene sheet and styrene tubing and brass castings. Custom transfers were applied.

Prototype:
