

7. Mike Fleming's UP Fairbanks-Morse Erie Built

These were the first post WW2 6 axle passenger units. F-M built these until the late 40s. They were used on secondary passenger trains with green, grey, and yellow cars in the 1940s and 50s. They are not sleek like the ALCO PAs but have that unique F-M character. This is a Proto 1000 HO model converted to DCC. *Mike Fleming*
