

5. Brian Sheron's Passenger Cars

The William S. Demas is an Athearn HO scale observation car that I custom painted as a privately-owned car.

Long Island Rail Road HO Scale MP70 - I found the cast resin shell for this car at a train show. There was no box or any identifier as to who the manufacturer was, but I suspect it is from a custom run by a hobby shop on Long Island. I attached drive system supports to the inside of the shell, and powered it with the drive mechanism

from a Proto 1000 RDC.
I added a DCC decoder
with electric
locomotive sound and
custom-painted it in
the Long Island Rail
Road Goodfellow
scheme from the
1960's.
Brian Sheron, MMR
