

## 7. JIM ALLEN'S WATERSLIDE DECALS

The N&W 611 on the side of the building is a water slide decal made by me specially for the side of that building. The second water slide decal is a bottle of coke pouring into a glass, again made by me on the computer for that building side. Both were done using Paintshop Pro, then printed on decal paper, printed and attached to the buildings. Several layers of Micro Sol were used to give the appearance of being painted on the building. *Jim Allen*
