

1. GREG CASSIDY'S SHERIFF'S INVESTIGATION

I thought “Dang, I don’t have anything that will work.” But downstairs I noticed something I had forgotten about. The sheriff (above) was visiting the apple packing plant since there had been reports about apples being pilfered off of the loading dock overnight.

Here’s a fire house (left) I built a couple years ago. But it’s not on my layout since it was S scale. It was a Motrak Models copy of the Alton Bay, New Hampshire fire station which is still there. *Greg Cassidy*
