

4. MARTIN BRECHBIEL'S HOSPITAL CAR

This is a very recently finished rebuild of an older, battered Walthers kit car [\(above\)](#) I took part, down to the metal.

Also this [\(left and below\)](#) is a scratchbuilt firehouse and tower with unique smokestack not easy to replicate that some might recognize: Colorado's Alpine Hose Company #2. The build of this was published in O Scale Trains years ago.
