

2. Ernie Little's Flatcar

One of my favorite flat cars is UP50596 a 40' flat car with a load consisting of a Caterpillar forestry dozer and blade secured with chains as a load. As I was in the fire department for over 38 years I had the opportunity to work around such a forestry dozer on several brush and wildland fires which the memories make the combination of the flat car and dozer load one of my favorites. **Ernie Little, MMR**
