

7. Greg Cassidy's Flatcars with Loads

These three flat cars are carrying a load from Bethlehem Steel to an unknown industry somewhere off my layout. As with many large loads I have no idea what they're actually for, but I'm sure they're important to someone. And some day I've got to get around to using chains or heavier bindings on that crankshaft. It's just waiting to go flying off and cause some headlines in the news. **Greg Cassidy**
