

## 6. Jerry Stanley's Pizza Box Project

The Pizza Box layout concept was developed by the Northern Utah Division of the NMRA. I am hoping to use it to encourage participants in a church youth program I am involved with to join the Potomac Division. I made a prototype of a 2'x2' N-scale layout ([photo left](#)) that was delivered recently to the church along with a custom made carrying case ([photo below](#)). Many people stopped by to examine it. NMRA magazines were handed out along with brochures. The plan is to have youngsters make their own layouts over a six week course.

Several manufacturers have committed to donating materials. In January we will start training volunteers to help. The first year we hope to have 20 kids and their parents participating. ***Jerry Stanley***
